

English All Year Round

English All Year Courses are available to Teens (12-17) and Adults (18+), and from Beginner to Advanced level. Courses run from September to June, excluding four weeks at Christmas and two at Easter, and course start/finish dates are flexible.

These programmes are intensive in nature and are flexible to suit individual needs. Teaching staff use course books, computers and other audio-visual technology to motivate and aid students. Homework is set during weekdays for evening study.

English Lessons

General English lessons improve the students' overall knowledge of the language. However, students may also wish to include tuition in specific academic subjects with our other students or work towards one of the independent English Language Certificates. Special options may be available for those wanting to concentrate on specific language skills. Lessons covering the English ways of life and culture are also included. Students may also be mixed in-class with students on academic courses.

Weekly teachers meetings enable us to monitor the progress of every student and to decide whether a change of level is necessary. All students are encouraged to make full use of college facilities and to mix with our other students.

Student Profile

Name: Reza Kazerooni
Age: 19
Nationality: Iranian
Course: English All Year

I initially joined the college on an English All Year course to improve my language skills before continuing my studies. I made such good progress that I decided to stay here for my further studies by taking a University Foundation course.

The excursions and sports are really good fun. I especially enjoy football. It's a beautiful place to stay and I've really enjoyed my time here.
